# Inkbomb Commerce Plugin guide

Sinalite API

# 1- Configuring Woocommerce and Inkbomb plugin:

## Step 1 - Setting up the categories:

- Navigate to Products > Categories
- Add some categories similar to the Sinalite website:
  - Brochures
  - Business Cards
  - Flyers
  - Greeting Cards
  - Postcards
  - Specialty Business Cards

## Step 2 - Sinalite configuration and category selection:

General configuration includes the following settings:
- **Import Products for category**: Select the categories you want to import the products for.
- **Price Markup**: Set the price markup you wish to apply.
- **Enable variation Schedule import**: Setting to **YES** allows the wordpress to run scheduled/cron jobs, which update the product and variations. (We will keep it disabled for now since it will require server side configuration as well. Checking it to YES may still run once in a day, but only when a wordpress is accessed, which is not recommended).

## Step 3 - Sinalite API Settings:

Sinalite API settings allow you to generate the access token and switch between the API environments.
- **Client ID**: Sinalite API client ID.
- **Client Secret**: Sinalite Api secret key sets here.
- **Environment**: Choose the api environment setting between **Sandbox** and **live**.

- **Access token**: Use the nearby **Generate** button to request access token generation. This field can only be generated after a token api request. (Before generating access token, make sure the client id, secret and environment settings are there).

## Step 4 - Tax settings:

Configure the tax settings using the following steps below:
- Navigate to **Woocommerce** > **Settings**, and from **General** tab, scroll down to **Enable Taxes** under **General Options** and check the checkbox **"Enable tax rates and calculations"**. Save the changes.

- Navigate to the **Tax** tab from Woocommerce settings, and set the **Prices entered with tax** radio option to **No, I will enter prices exclusive of tax**.

- Scroll down a bit and set all settings as following:
  - **Calculate tax based on**: Customer Shipping address
  - **Shipping tax class:** Standard
  - Keep the **Rounding** checkbox unchecked.
  - **Display prices in the shop**: Excluding tax
  - **Display prices during cart and checkout**: Including tax
  - **Display tax totals:** Itemized

- Switch to the **Standard rates** tab under **Tax** tab, and add a tax rate having 0% rate. Name the rate as **Tax**.

# Step 5 - Shipping settings:

We may improve Shipping settings later on. However we use the configuration below for now:
Navigate to **Shipping** tab from woocommerce configuration and do the following configurations:
- Create or edit a zone. From Zone regions settings, allow **Canada** and the United States.

- Since the Sinalite API needs specific shipping methods. So we would create those shipping addresses here, under flat rate. Follow the steps below:
  - Click the button **Add shipping method**. It will show a pop up screen.
  - From the dropdown select **Flat rate** and click **Add shipping method** button.

  - Edit the flat rate:

  - From the method **title** name the shipping method; for example UPS Standard, keep it **taxable** and set the cost to **0** (The cost will be calculated by Sinalite API).

  - Save changes, and now Flat rate title will appear as **UPS Standard** shipping method. Save the rest of API listed methods using the same step described above.

- ○ The Sinalite allows following methods only:
  - ■ UPS Standard
  - ■ UPS Express
  - ■ UPS Expedited
  - ■ UPS Express Saver
  - ■ UPS Worldwide Expedited
  - ■ UPS Saver
  - ■ FedEx Standard Overnight
  - ■ FedEx Economy
  - ■ FedEx Express Saver
  - ■ FedEx International Economy
  - ■ FedEx International Priority

## Step 6 - Currency settings:

Navigate to Woocommerce general settings and scroll down to the **Currency options** and set the **Number of decimals** to **2**.

# 2- Importing products:

To import products navigate to **Inkbomb commerce** and switch to the **Import product** tab. Follow the steps below to import the products:

- Choose Categories from multiselect. It will filter the products from Sinalite API and import them.
- Click the **Fetch Product list** button to list down the products to be imported.
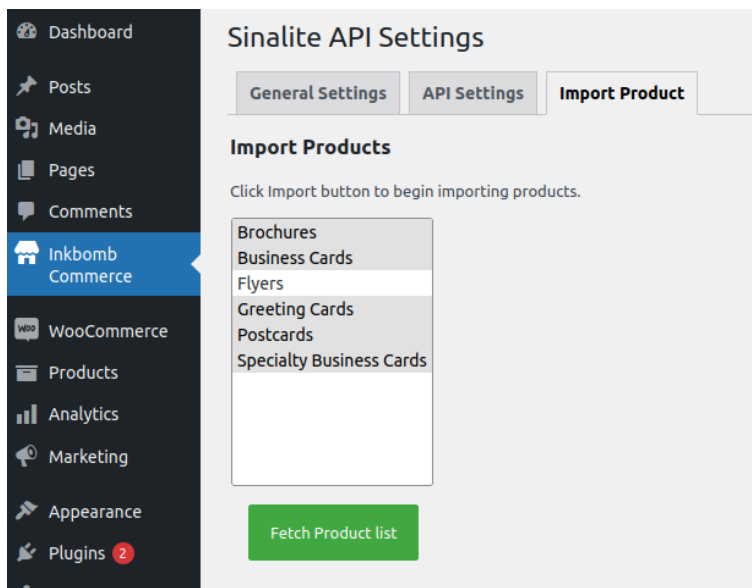

- It will list down the Sinalite products:

| Deselect All | ID | Name | SKU | Category | Import Status |
|---|---|---|---|---|---|
| ☑ | 1 | Business cards 14pt (Profit Maximizer) | businesscard_14pt_profit_maximizer | Business Cards | Ready to import |
| ☑ | 2 | Business Cards 14pt + AQ | businesscard_14pt_aq | Business Cards | Ready to import |
| ☑ | 7 | Business Cards 14pt + UV (High Gloss) | businesscard_14pt_uv_high_gloss | Business Cards | Ready to import |
| ☑ | 8 | Business cards 14pt + Matte Finish | businesscard_14pt_matte_satin_aq | Business Cards | Ready to import |
| ☑ | 9 | Business cards 16pt Matte / Silk Lamination | businesscard_16pt_matte_silk_lamination | Business Cards | Ready to import |
| ☑ | 10 | Business cards 16pt Gloss Lamination | businesscard_16pt_gloss_lamination | Business Cards | Ready to import |
| ☑ | 11 | Business cards 14pt Writable + AQ (C1S) | businesscard_14pt_writable_aq_c1s | Business Cards | Ready to import |
| ☑ | 12 | Business cards 14pt Writable + UV (C1S) | businesscard_14pt_writable_uv_c1s | Business Cards | Ready to import |
| ☑ | 13 | Business cards 13pt Enviro Uncoated | businesscard_13pt_enviro_uncoated | Business Cards | Ready to import |
| ☑ | 15 | Business cards 16pt + AQ | businesscard_16pt_aq | Business Cards | Ready to import |

- From the list select all or specific products that need to be imported and click **Import Products** button to begin importing. The products will be imported one by one.

# 3- Order Detail Page:

The order details page include:
- **Sinalite Order Summary:** The summary returned by sinalite api after placing order with it.

## Sinalite Order Summary

**Status:** success
